Explanations

1. Which city is associated with code DTW?

A. Detroit, Michigan

B. Houston, Texas

C. Hartford Springfield, Connecticut

D. Martha's Vineyard, Massachusetts

DTW is the IATA airport code for Detroit. IATA codes are the three-letter identifiers used worldwide to name airports in tickets and schedules. The Detroit Metropolitan Wayne County Airport serves Detroit, Michigan, which is why the code DTW is linked to that city. The other options correspond to different places: Houston's major airports use codes like IAH or HOU, Hartford/Springfield is associated with Bradley International (BDL), and Martha's Vineyard has MVY. So, Detroit, Michigan is the city associated with DTW.

2. Which IATA code corresponds to Presque Isle Northern Maine Airport?

A. PQI

B. ISP

C. MHT

D. AMS

Knowing IATA airport codes helps you map a three-letter identifier to the exact airport it represents. PQI is the IATA code for Presque Isle Northern Maine Regional Airport in Presque Isle, Maine. The other codes point to different airports: ISP is Islip MacArthur Airport on Long Island, NY; MHT is Manchester-Boston Regional Airport in Manchester, NH; AMS is Amsterdam's Schiphol Airport in the Netherlands. So PQI is the code that corresponds to Presque Isle.

3. What is the IATA code for Antigua's V. C. Bird International Airport?

A. ANU

B. ALB

C. ATL

D. CUN

IATA airport codes are the three-letter identifiers used by travelers and airlines to name airports. For Antigua's V. C. Bird International Airport, near St. John's, this code is ANU. It's the tag you'd see on tickets, boarding passes, and baggage tags to indicate Antigua's main international hub. The other codes map to different airports: ALB is Albany International in New York, ATL is Atlanta's Hartsfield-Jackson, and CUN is Cancun International in Mexico. So ANU is the correct code for Antigua's VC Bird International Airport.

4. What is the airport name for MSY?

A. New Orleans International Airport

B. Newark Liberty International Airport

C. Philadelphia International Airport

D. Phoenix Sky Harbor International Airport

Three-letter IATA codes identify airports worldwide, and MSY is the code for the airport that serves New Orleans, Louisiana. The official name is Louis Armstrong New Orleans International Airport, though it's commonly referred to as New Orleans International Airport in many contexts. Among the given options, the one that matches New Orleans is New Orleans International Airport. The other options correspond to Newark Liberty International Airport, Philadelphia International Airport, and Phoenix Sky Harbor International Airport.

5. Which city is associated with the IATA code BNA?

A. Nashville, TN

B. St. George's, Grenada

C. Havana, Cuba

D. Guayaquil, Ecuador

IATA airport codes are the three-letter identifiers used worldwide to identify airports. BNA specifically designates Nashville International Airport in Nashville, Tennessee. These codes appear on tickets, boarding passes, baggage tags, and flight information displays to keep travel clear and standardized. The reason BNA fits Nashville is tied to the airport's history as Berry Field, which influenced its three-letter code; the result is a distinct, memorable abbreviation for that airport. For the other cities listed, the corresponding IATA codes are different: Havana uses HAV, St. George's Grenada uses GND, and Guayaquil uses GYE. So BNA is Nashville's code.

6. San Francisco International Airport's IATA code?

A. SFO

B. SJC

C. LAX

D. LAS

IATA airport codes are three-letter identifiers used worldwide to name airports on tickets, baggage tags, and flight information. Each airport has a unique code that helps distinguish it from others, even when cities share similar names. For San Francisco International Airport, the code is SFO. This three-letter tag is the standard label you'll see on boarding passes, baggage tags, and flight boards for flights to and from San Francisco. The other codes point to different airports: SJC belongs to San Jose International, LAX is Los Angeles International, and LAS is Las Vegas. Knowing these helps you quickly recognize which city each code represents. Therefore, San Francisco International Airport is identified by SFO.

7. Puerto Plata La Union Airport is designated by which code?

A. POP

B. PUJ

C. SDQ

D. PAP

IATA airport codes are three-letter identifiers that uniquely name airports around the world. For Puerto Plata La Union Airport, the assigned code is POP. This tag is used by airlines, ticketing, and baggage systems to reference the airport quickly and unambiguously. Other codes here refer to different airports: PUJ is Punta Cana International Airport, SDQ is Las Américas International Airport serving Santo Domingo, and PAP is Port-au-Prince International Airport in Haiti.

8. Which code corresponds to an airport in Oregon?

A. PDX

B. LAS

C. SFO

D. MCO

Understanding IATA airport codes helps you map a three-letter code to a specific airport and its location. PDX is the IATA code for Portland International Airport, which serves Portland, Oregon. This makes it the code you'd use for flights to or from Oregon. The other codes correspond to airports in different states: LAS is Las Vegas's airport in Nevada; SFO is San Francisco International Airport in California; MCO is Orlando International Airport in Florida. So PDX is the one associated with Oregon.

9. Which city is associated with the code BQN?

A. Aguadilla, Puerto Rico

B. Salt Lake City, Utah

C. Albuquerque, New Mexico

D. Chicago-O'Hare, Illinois

Three-letter IATA airport codes identify airports around the world. BQN is the code for Rafael Hernández Airport, which serves Aguadilla, Puerto Rico. The other cities have different codes—Salt Lake City is SLC, Albuquerque is ABQ, and Chicago O'Hare is ORD—so BQN specifically points to Aguadilla.

10. Which city is associated with the IATA code ANU?

A. Antigua

B. St. Maarten

C. Cancun

D. Providenciales

IATA airport codes are three-letter identifiers that map to a specific airport and the city it serves. ANU designates V. C. Bird International Airport near St. John's in Antigua and Barbuda, so the city commonly associated with ANU is Antigua. The other locations have different codes—St. Maarten is SXM, Cancun is CUN, and Providenciales is PLS—so they don't match ANU.
