Questions

SAMPLE

- 1. Why is it important to learn and practice wildlife identification before hunting?**
 - A. To comply with game laws**
 - B. To ensure safety**
 - C. To select the correct ammunition**
 - D. All of the above**
- 2. What is a safe practice when using a tree stand?**
 - A. Always use a ladder to reach your stand**
 - B. Never use a safety harness**
 - C. Always use a haul line to bring up your unloaded gun**
 - D. Climb higher than the stand for a better view**
- 3. What should be done with fish and game laws?**
 - A. They should be memorized**
 - B. They should be randomly checked**
 - C. They should be followed only if caught**
 - D. They should be discussed and debated while hunting**
- 4. What color clothing is best for visibility and safety while hunting?**
 - A. Green**
 - B. Red**
 - C. Black**
 - D. Blaze orange**
- 5. What type of conservation funding is supported by hunters through license sales?**
 - A. Road construction**
 - B. School education programs**
 - C. Wildlife management and habitat protection**
 - D. Public transportation improvements**

- 6. What should you do before climbing into or out of a tree stand?**
- A. Unload your firearm**
 - B. Notify someone of your location**
 - C. Take a selfie and post it online**
 - D. Make sure your safety harness is loosened**
- 7. Which of these is a symptom of hypothermia?**
- A. Slow pulse**
 - B. Hot, dry skin**
 - C. Shivering**
 - D. Rapid breathing**
- 8. Before crossing a fence with a firearm, what should you do?**
- A. Unload the firearm and pass it under the fence**
 - B. Jump over the fence while holding the firearm**
 - C. Hand the firearm to a companion**
 - D. Carry the firearm with the safety on**
- 9. Which factor is most important in choosing ammunition for hunting big game?**
- A. Price**
 - B. Brand**
 - C. Size and weight of the game**
 - D. Color of the ammunition case**
- 10. What is the best way to transport firearms safely?**
- A. Loaded and assembled in the backseat**
 - B. Unloaded and cased**
 - C. Handed to another person**
 - D. With the safety on**

Answers

SAMPLE

- 1. D**
- 2. C**
- 3. A**
- 4. D**
- 5. C**
- 6. A**
- 7. C**
- 8. A**
- 9. C**
- 10. B**

SAMPLE

Explanations

SAMPLE

1. Why is it important to learn and practice wildlife identification before hunting?

- A. To comply with game laws**
- B. To ensure safety**
- C. To select the correct ammunition**
- D. All of the above**

By learning and practicing wildlife identification, hunters are able to comply with game laws, ensuring the sustainability of the wildlife population and environment. This also promotes safety by preventing accidental hunting of non-game or protected species. Additionally, correctly identifying the targeted species allows hunters to select the appropriate ammunition and hunting methods, ensuring a more effective and humane kill. Therefore, all of the above options are important reasons to learn and practice wildlife identification before hunting.

2. What is a safe practice when using a tree stand?

- A. Always use a ladder to reach your stand**
- B. Never use a safety harness**
- C. Always use a haul line to bring up your unloaded gun**
- D. Climb higher than the stand for a better view**

Using a haul line to bring up your unloaded gun is a safe practice when using a tree stand because it prevents any accidents from occurring while you are climbing up the tree. Option A is incorrect as using a ladder can still cause accidents. Option B is also incorrect as not using a safety harness increases the risk of falling from the stand. Option D is incorrect because climbing higher than the stand can cause instability and increase the chances of your stand falling.

3. What should be done with fish and game laws?

- A. They should be memorized**
- B. They should be randomly checked**
- C. They should be followed only if caught**
- D. They should be discussed and debated while hunting**

Fish and game laws are put in place to protect wildlife and ensure sustainable environments. This means that these laws are important and should be followed closely. Memorizing the laws will help you be aware of what is allowed and what is not allowed at all times. Options B and C are incorrect because random checks may result in penalties for breaking the laws, and only following them when caught defeats the purpose of having them in the first place. Option D is also incorrect because laws should be followed at all times, not just while actively hunting.

4. What color clothing is best for visibility and safety while hunting?

A. Green

B. Red

C. Black

D. Blaze orange

Wearing blaze orange clothing is recommended for hunting as it provides high visibility and safety. Green and red may blend in with the natural environment and make it difficult for other hunters to see you. Black clothing is not easily visible in low light conditions, which can be dangerous during hunting.

5. What type of conservation funding is supported by hunters through license sales?

A. Road construction

B. School education programs

C. Wildlife management and habitat protection

D. Public transportation improvements

Many hunters are also conservationists, as they understand the importance of preserving wildlife and their habitats. When hunters purchase hunting licenses, a portion of the funds go towards wildlife management and habitat protection efforts. This allows for sustainable hunting practices and supports the overall health of wildlife populations. Options A, B, and D are not directly related to conservation funding supported by hunters through license sales. While these may all be important areas of funding, they are not specifically tied to the contributions made by hunters through license sales.

6. What should you do before climbing into or out of a tree stand?

A. Unload your firearm

B. Notify someone of your location

C. Take a selfie and post it online

D. Make sure your safety harness is loosened

Before climbing into or out of a tree stand, it is important to unload your firearm for safety purposes. This is because any sudden movements or unexpected events while climbing can cause the firearm to accidentally discharge. Additionally, it is important to notify someone of your location in case of any emergencies or accidents while in the tree stand. Taking a selfie and posting it online is not necessary and can distract from safety precautions. Making sure your safety harness is loosened is also not necessary and can pose a potential danger while climbing.

7. Which of these is a symptom of hypothermia?

- A. Slow pulse**
- B. Hot, dry skin**
- C. Shivering**
- D. Rapid breathing**

Hypothermia is a condition in which the body's temperature drops below a normal level, typically due to exposure to cold temperatures. Shivering is a natural response to help generate heat and maintain the body's internal temperature when it drops too low. Option A, a slow pulse, would typically be a symptom of severe hypothermia when the body is no longer able to maintain its normal functions. Option B, hot dry skin, is a symptom of hyperthermia, which is the opposite of hypothermia and is caused by exposure to high temperatures. Option D, rapid breathing, may occur as the body tries to compensate for the lowered internal temperature, but it is not a specific symptom of hypothermia. Therefore, the correct answer is option C, shivering, as it is a direct symptom of the body's response to hypothermia.

8. Before crossing a fence with a firearm, what should you do?

- A. Unload the firearm and pass it under the fence**
- B. Jump over the fence while holding the firearm**
- C. Hand the firearm to a companion**
- D. Carry the firearm with the safety on**

Before crossing a fence with a firearm, it is important to ensure that the firearm is not loaded and has no potential to accidentally discharge. Unloading the firearm and passing it under the fence is the safest option as it prevents any accidental shots from happening. Jumping over the fence while holding the firearm, handing it to a companion, or carrying it with the safety on are all unsafe options as they still pose a risk of unintentional firing. Furthermore, handing a firearm to someone else is not recommended as it is important to always be responsible for your own firearm. Therefore, unloading the firearm and passing it under the fence is the correct and safest course of action.

9. Which factor is most important in choosing ammunition for hunting big game?

- A. Price**
- B. Brand**
- C. Size and weight of the game**
- D. Color of the ammunition case**

The most important factor in choosing ammunition for hunting big game is the size and weight of the game. This is because different animals have different physical characteristics and require different types of ammunition for an effective and ethical kill. Price and brand are less important factors as they do not necessarily indicate the quality or suitability of the ammunition. The color of the ammunition case is also not relevant to its effectiveness in hunting.

10. What is the best way to transport firearms safely?

A. Loaded and assembled in the backseat

B. Unloaded and cased

C. Handed to another person

D. With the safety on

Transporting firearms safely is crucial for both your own safety and those around you. Option A is incorrect because it is dangerous to transport a loaded and assembled firearm in the backseat as it increases the risk of accidental discharge. Option C is also incorrect because it is not safe to hand a firearm off to another person while in a moving vehicle. Option D may seem like a good idea, but the safety can sometimes fail and it is best to take extra precautions. This leaves Option B as the best choice, as it ensures the firearm is unloaded and properly stored in a case to prevent any mishaps.
