SAMPLE

1. Who was the madam that ran the Arlington Mansion, known for offering a sex circus for an additional fee?

- A. Henriette DeLille**
- B. Margaret Haugherty**
- C. Tennessee Williams**
- D. Josie Arlington**

The correct answer is Josie Arlington, who was a notable figure in New Orleans' history. She ran the Arlington Mansion in the late 19th century and was known for operating a high-profile brothel. The mansion became infamous for its lavish and extravagant offerings, which included what was termed a "sex circus," showcasing a variety of performances and erotic entertainment for her clientele. This reputation contributed significantly to the allure and notoriety of the Arlington Mansion in the context of New Orleans' colorful and often scandalous past. Henriette DeLille is remembered for her religious contributions and founding the Sisters of the Holy Family, which is unrelated to the context of entertainment or brothel management. Margaret Haugherty was known for her role in operating a different establishment and is often remembered in connection with other aspects of the city's history but not with the Arlington Mansion specifically. Tennessee Williams, while an iconic playwright associated with New Orleans, did not play a role in the world of brothels or the scandalous entertainment scene that Josie Arlington was involved with.

2. What role did the Louisiana State Arsenal serve during Spanish dominance?

- A. It was a marketplace**
- B. A fortification site**
- C. A prison**
- D. A residence for prominent families**

During Spanish dominance, the Louisiana State Arsenal served as a prison. This facility played a crucial role in the management of law and order during a tumultuous period in New Orleans' history. The arsenal was designed to house prisoners, particularly those convicted of crimes against the Spanish Crown, and to maintain control over the territory by housing individuals considered a threat to governance. The use of the arsenal as a prison reflected the Spanish colonial government's priorities in asserting authority and ensuring compliance with its laws. By detaining offenders in this location, the Spanish demonstrated an organized approach to maintain security in the city. Other roles, such as a marketplace or a residence for prominent families, would not align with the historical function of the arsenal during this period. Similarly, while the arsenal might possess some fortification traits as a military installation, its primary identity during the Spanish rule was firmly as a penal facility. Understanding this context helps highlight how the arsenal contributed to the socio-political landscape of colonial New Orleans.

3. Who married Lydia Latrobe and was a partner in the Steamboat New Orleans venture?

- A. Nicolas Girod**
- B. Nicholas Roosevelt**
- C. Andrew Jackson**
- D. Marie Laveau**

The correct answer is Nicholas Roosevelt, who not only married Lydia Latrobe but was also a key figure in the Steamboat New Orleans venture. The Steamboat New Orleans, built in 1811, is significant in American history as it was one of the first steamboats to navigate the Mississippi River effectively, marking a transformation in transportation and commerce in the region. Nicholas Roosevelt, who was involved in the business aspects of this venture, contributed to the development of steamboat travel, which had a profound impact on the economy and culture of New Orleans and the surrounding areas. In this context, it is important to recognize Roosevelt's role and how his marriage to Lydia Latrobe connected him to prominent families and the burgeoning society of New Orleans at that time. His contributions reinforced the steamboat's importance in expanding trade routes and enabling greater access to markets, which was crucial to the growth of New Orleans as a major port city.

4. What type of house is referred to as a Camelback House?

- A. A house with dual entrances**
- B. A single-story house that rises to a second story in the rear**
- C. A multi-level Victorian home**
- D. A transitional style between modern and colonial**

A Camelback House is characterized as a single-story home that features a raised second story at the rear. This architectural style is prevalent in New Orleans and is defined by its distinctive profile, resembling a camel's hump. The design makes it particularly functional for urban settings, allowing for maximum use of space while providing an efficient layout that often accommodates growing families or increasing living needs. This style is practical for a hot climate, as the single-story front can maintain airflow and keep the main living areas cooler, while the second story offers additional bedrooms or living space, often with more privacy. The name "Camelback" specifically describes this unique shape of the structure—therefore, understanding the form and function of this design is crucial for correctly identifying it within the context of New Orleans architecture.

5. What notable feature did the Soniat House once have that was later replaced?

- A. Bricks**
- B. Wooden panels**
- C. Wrought iron embellishments**
- D. Roof tiles**

The Soniat House is well-known for its beautiful architecture that reflects the unique blend of influences in New Orleans' rich history. One notable feature is its original wrought iron embellishments, which were integral to the house's character. Over time, these wrought iron features were replaced, possibly due to changes in aesthetic trends, the need for modernization, or preservation efforts to restore historical elements. Wrought iron is typified by its durability and intricate designs, making it a defining aspect of many historic buildings in the region. The decision to replace these embellishments may have been influenced by a desire to maintain the structure's integrity while ensuring safety and authenticity in restoration practices. The current forms of these embellishments typically embody modern interpretations of those historic designs, aligning with contemporary standards while trying to preserve the essence of the original architecture. The other options, while they might refer to features in other historic buildings, do not hold the same significance specifically tied to the Soniat House's identity and architectural narrative.

6. Who was the French financier that influenced the economic growth of Nouvelle France?

- A. General Alexander O'Reilly**
- B. Antoine Crozat**
- C. Jean Baptiste Le Moyne**
- D. Rene Robert Cavelier de la Salle**

Antoine Crozat played a pivotal role in the economic development of Nouvelle France through his involvement in the fur trade and the establishment of a colonial monopoly. Appointed by King Louis XIV in 1712 as the first proprietor of Louisiana, he was granted exclusive rights to trade and govern the region, which significantly shaped its economic landscape. Crozat's investment in the territory facilitated the growth of settlements and enhanced trade networks, establishing a foundation for the burgeoning economy of Nouvelle France. Under his leadership, efforts were made to promote agriculture and generate wealth through profitable enterprises, which attracted settlers and traders alike. His focus on expanding trade relationships with Native American tribes and his strategic support for resource extraction set the stage for future economic activities in the region. This extensive influence made him a central figure in the early years of Louisiana's history, establishing economic practices that would impact future generations.

7. Which location honors the Louisiana armed forces from 1898 to 1902?

- A. Poydras Street and Loyola Avenue**
- B. Sophie B. Wright Place**
- C. City Park**
- D. Jackson Square**

The correct choice honors the Louisiana armed forces from 1898 to 1902 because it is located at the intersection of Poydras Street and Loyola Avenue, specifically housing a monument that pays tribute to the Louisiana soldiers who served during the Spanish-American War and the Philippine-American War. These conflicts were critical in American history, and the monument serves as a symbol of recognition and remembrance for the sacrifices made by those who served during that period. This particular location has significant historical relevance due to its connectivity to the military and the actions taken by Louisianans during these military engagements. It is a site where the contributions and valor of local servicemen are highlighted and commemorated, which aligns with the purpose of the question. Other locations mentioned do not have a specific monument or tribute dedicated to the armed forces of that period, making the Poydras Street and Loyola Avenue intersection the appropriate choice.

8. What is the title given to the financier who took control of Nouvelle France for five years?

- A. John Law**
- B. Pierre Le Moyne di'berville**
- C. Antoine Crozat**
- D. Sieur de la Salle**

The correct answer is Antoine Crozat, who was granted a proprietary concession by King Louis XIV in the early 18th century. Crozat was responsible for managing French Louisiana, then known as Nouvelle France, for five years beginning in 1712. His role was significant as he was tasked with establishing a profitable colony, though his venture faced many challenges, including difficulties in generating sufficient revenue and conflict with Native American tribes. This experience laid the groundwork for future colonization efforts in the region. While other figures like John Law contributed to the economic development through ideas like the Mississippi Bubble, their roles were distinct and took place in different contexts. Pierre Le Moyne d'Iberville is known for his exploration and founding of settlements but did not hold control over Nouvelle France in the same way. Sieur de la Salle was instrumental in the early exploration of the Mississippi River and claimed Louisiana for France but did not have the same financial or administrative authority Crozat had during his term.

9. In what year did General O'Reilly arrive with 2000 soldiers to claim New Orleans for Spain?

- A. 1765**
- B. 1769**
- C. 1770**
- D. 1775**

The arrival of General O'Reilly in 1769 marked a significant event in the history of New Orleans, as he brought 2,000 soldiers to assert Spanish control over the city. This action was part of Spain's efforts to consolidate its power following the Treaty of Paris in 1763, which ceded Louisiana to Spain after France lost the territory during the Seven Years' War. O'Reilly's arrival was not only a military operation but also entailed administrative changes as he aimed to establish a new colonial government and secure the loyalty of the local population. This historical moment is crucial in understanding the transition of New Orleans from French to Spanish rule, thus laying the groundwork for the city's future development under Spanish governance.

10. Who was an investor in the Steamboat New Orleans, which first arrived in 1812?

- A. Nicolas Girod**
- B. Nicholas Roosevelt**
- C. Benjamin Latrobe**
- D. Marie Laveau**

Nicholas Roosevelt was an investor in the Steamboat New Orleans, which made its inaugural journey in 1812. He played a significant role in the development of steamboat technology and was closely associated with the early steamboat era in the United States. The Steamboat New Orleans is historically important as it was the first steamboat to navigate the Mississippi River, marking a pivotal moment in transportation and commerce in the region. Roosevelt's investment was part of the broader movement during this time aimed at exploiting the advantages of steam-powered vessels. This innovation led to improved trade routes and transportation efficiency, thus transforming river travel in America, particularly in relation to New Orleans, which became a crucial economic hub. The successful operation of steamboats like the New Orleans helped to spur further development and investment in similar ventures. The other individuals mentioned did not have the same direct connection to the Steamboat New Orleans as Roosevelt did. While they each played significant roles in New Orleans' history, their focus was elsewhere, such as urban development or cultural contributions rather than the steamboat industry.
