Introduction

Preparing for a certification exam can feel overwhelming, but with the right tools, it becomes an opportunity to build confidence, sharpen your skills, and move one step closer to your goals. At Examzify, we believe that effective exam preparation isn't just about memorization, it's about understanding the material, identifying knowledge gaps, and building the test-taking strategies that lead to success.

This guide was designed to help you do exactly that.

Whether you're preparing for a licensing exam, professional certification, or entry-level qualification, this book offers structured practice to reinforce key concepts. You'll find a wide range of multiple-choice questions, each followed by clear explanations to help you understand not just the right answer, but why it's correct.

The content in this guide is based on real-world exam objectives and aligned with the types of questions and topics commonly found on official tests. It's ideal for learners who want to:

- Practice answering questions under realistic conditions,
- Improve accuracy and speed,
- Review explanations to strengthen weak areas, and
- Approach the exam with greater confidence.

We recommend using this book not as a stand-alone study tool, but alongside other resources like flashcards, textbooks, or hands-on training. For best results, we recommend working through each question, reflecting on the explanation provided, and revisiting the topics that challenge you most.

Remember: successful test preparation isn't about getting every question right the first time, it's about learning from your mistakes and improving over time. Stay focused, trust the process, and know that every page you turn brings you closer to success.

Let's begin.

How to Use This Guide

This guide is designed to help you study more effectively and approach your exam with confidence. Whether you're reviewing for the first time or doing a final refresh, here's how to get the most out of your Examzify study guide:

1. Start with a Diagnostic Review

Skim through the questions to get a sense of what you know and what you need to focus on. Your goal is to identify knowledge gaps early.

2. Study in Short, Focused Sessions

Break your study time into manageable blocks (e.g. 30 – 45 minutes). Review a handful of questions, reflect on the explanations.

3. Learn from the Explanations

After answering a question, always read the explanation, even if you got it right. It reinforces key points, corrects misunderstandings, and teaches subtle distinctions between similar answers.

4. Track Your Progress

Use bookmarks or notes (if reading digitally) to mark difficult questions. Revisit these regularly and track improvements over time.

5. Simulate the Real Exam

Once you're comfortable, try taking a full set of questions without pausing. Set a timer and simulate test-day conditions to build confidence and time management skills.

6. Repeat and Review

Don't just study once, repetition builds retention. Re-attempt questions after a few days and revisit explanations to reinforce learning. Pair this guide with other Examzify tools like flashcards, and digital practice tests to strengthen your preparation across formats.

There's no single right way to study, but consistent, thoughtful effort always wins. Use this guide flexibly, adapt the tips above to fit your pace and learning style. You've got this!

Questions

SAMPLE

- 1. How long is a waiver granted for?**
 - A. Not to exceed one renewal cycle
 - B. Up to 2 years
 - C. 3 months
 - D. Indefinitely
- 2. What happens if the PT section does not receive a request for an administrative hearing?**
 - A. The PT section may take appropriate action based on the charges.
 - B. The charges are automatically dismissed.
 - C. The PT section must wait indefinitely for a response.
 - D. A new hearing date is scheduled.
- 3. How often does a PT/A license expire?**
 - A. Annually
 - B. Biennially
 - C. Every five years
 - D. Every ten years
- 4. What actions can the Physical Therapy Section take after an investigation or hearing?**
 - A. Award medical degrees
 - B. License suspension or revocation
 - C. Provide medical treatment
 - D. Host medical conferences
- 5. Who is considered a 'Supervising Physical Therapist'?**
 - A. Any PT available to supervise
 - B. The most experienced PT in the facility
 - C. Physical therapist who performed the initial examination or another PT available for supervision
 - D. Only PTs with a doctoral degree

- 6. What is the importance of patient consent in physical therapy practice in Ohio?**
- A. It allows for treatment regardless of patient understanding
 - B. It ensures that patients are informed and agree to the proposed treatment
 - C. It is only necessary for surgical procedures
 - D. It can be waived in emergencies
- 7. How many continuing education units does a PT require for renewal?**
- A. 24 CEU's
 - B. 12 CEU's
 - C. 30 CEU's
 - D. 18 CEU's
- 8. What does the practice of Physical Therapy mainly include?**
- A. Use of therapeutic exercises and rehabilitative procedures
 - B. Prescription of medications
 - C. Performing surgical procedures
 - D. Diagnosing medical conditions
- 9. Under what conditions can a physical therapist appropriately terminate services?**
- A. If the patient refuses to participate in the plan of care or is non-compliant
 - B. If the patient has met all their goals
 - C. If the patient is not making progress or if they refuse to participate in the plan of care
 - D. If the physical therapist is too busy
- 10. What may the PT section require if the licensee's physical or mental condition is questioned in a disciplinary proceeding?**
- A. Immediate license revocation
 - B. Submission to examinations by a healthcare practitioner
 - C. A public apology
 - D. Compulsory training courses

SAMPLE

Explanations

SAMPLE

1. How long is a waiver granted for?

- A. Not to exceed one renewal cycle
- B. Up to 2 years
- C. 3 months
- D. Indefinitely

A waiver is typically granted for a specific amount of time, not to exceed one renewal cycle. This means that the waiver will last for at least one renewal cycle but can be shorter if the entity granting the waiver determines it is appropriate. Option B is incorrect because it specifies a specific amount of time (2 years) which may not align with the renewal cycle. Option C is incorrect because it is a short amount of time and may not cover the duration of the renewal cycle. Option D is incorrect because waivers are typically not granted indefinitely, as they have an expiration date to ensure proper monitoring and evaluation.

2. What happens if the PT section does not receive a request for an administrative hearing?

- A. The PT section may take appropriate action based on the charges.
- B. The charges are automatically dismissed.
- C. The PT section must wait indefinitely for a response.
- D. A new hearing date is scheduled.

If the PT section does not receive a request for an administrative hearing, the charges will not be automatically dismissed, as option B suggests. They may still take necessary action based on the charges, which could include a default judgment being entered against the respondent. The PT section is also not required to wait indefinitely for a response, as option C implies. A new hearing date may be scheduled in the event that a request for an administrative hearing is received at a later date. However, the most appropriate and accurate answer is still option A.

3. How often does a PT/A license expire?

- A. Annually
- B. Biennially
- C. Every five years
- D. Every ten years

A PT/A license expires biennially, which means every two years. This option is correct because unlike the other choices, it accurately reflects the renewal cycle for PT/A license. Option A is incorrect because annually means every year, which is a shorter time frame than biennially. Option C and D are incorrect because every five or ten years is a longer renewal cycle than biennially.

4. What actions can the Physical Therapy Section take after an investigation or hearing?

- A. Award medical degrees
- B. License suspension or revocation**
- C. Provide medical treatment
- D. Host medical conferences

The Physical Therapy Section does not have the authority to award medical degrees or provide medical treatment. Additionally, hosting medical conferences would not be a potential action to take after an investigation or hearing. Therefore, the only option that is directly related to the authority of the Physical Therapy Section and would address issues identified in an investigation or hearing is the suspension or revocation of a license. This action would ensure that the Section is able to uphold the highest standards of care and hold practitioners accountable for any misconduct.

5. Who is considered a 'Supervising Physical Therapist'?

- A. Any PT available to supervise
- B. The most experienced PT in the facility
- C. Physical therapist who performed the initial examination or another PT available for supervision**
- D. Only PTs with a doctoral degree

A is incorrect because not just any PT can supervise. They must meet certain qualifications and have a specific relationship with the patient. B is incorrect because being the most experienced PT does not necessarily mean they have the proper qualifications or relationship with the patient to serve as a supervising PT. D is incorrect because a doctoral degree is not a requirement for being a supervising PT. They must have a specific relationship with the patient and meet certain qualifications.

6. What is the importance of patient consent in physical therapy practice in Ohio?

- A. It allows for treatment regardless of patient understanding
- B. It ensures that patients are informed and agree to the proposed treatment**
- C. It is only necessary for surgical procedures
- D. It can be waived in emergencies

The significance of patient consent in physical therapy practice in Ohio is primarily centered around the principle of informed consent, which is captured well by the correct answer. Informed consent is a fundamental ethical and legal requirement that requires healthcare providers, including physical therapists, to thoroughly inform patients about their treatment options, associated risks, benefits, and potential outcomes before any procedures begin. This process enables patients to make educated decisions regarding their care, fostering a collaborative relationship between the therapist and the patient. When patients are informed and agree to the proposed treatment, it not only respects their autonomy but also enhances their engagement in the treatment plan. This shared decision-making process ultimately contributes to better therapeutic outcomes as patients feel more in control and are more likely to adhere to treatment protocols. In contrast, the incorrect answers highlight certain misconceptions. For example, the idea that consent allows for treatment without patient understanding contradicts the foundational principles of informed consent. Treating a patient without their understanding or agreement can lead not only to ethical violations but also to legal repercussions. The notion that consent is only necessary for surgical procedures is misleading; consent is required for all forms of treatment, including non-invasive therapeutic interventions. Additionally, while there are certain circumstances, such as emergencies, where consent might be implied, these situations

7. How many continuing education units does a PT require for renewal?

- A. 24 CEU's**
- B. 12 CEU's
- C. 30 CEU's
- D. 18 CEU's

Continuing education units (CEUs) are a way for professionals to maintain their knowledge and skills in their field through ongoing education and training. To renew their license, a physical therapist (PT) is required to complete a certain number of CEUs within a defined period of time. In this case, a PT requires 24 CEUs for renewal. The other options are incorrect as they do not meet the minimum requirement of 24 CEUs. Option B and D are below the requirement, while option C is above it. It is important for PTs to maintain a continuous learning mindset to provide the best care for their patients.

8. What does the practice of Physical Therapy mainly include?

- A. Use of therapeutic exercises and rehabilitative procedures**
- B. Prescription of medications
- C. Performing surgical procedures
- D. Diagnosing medical conditions

Physical Therapy is a healthcare profession that focuses on the treatment of musculoskeletal injuries and disorders. As such, it mainly includes the use of therapeutic exercises and rehabilitative procedures to improve and restore mobility, strength, and function in patients. This helps them to recover from injuries or manage chronic conditions. The practice of Physical Therapy does not involve prescribing medications or performing surgical procedures, as these are solely within the scope of medical doctors. Although Physical Therapists may occasionally diagnose medical conditions, it is not the main focus of their practice.

9. Under what conditions can a physical therapist appropriately terminate services?

- A. If the patient refuses to participate in the plan of care or is non-compliant
- B. If the patient has met all their goals
- C. If the patient is not making progress or if they refuse to participate in the plan of care**
- D. If the physical therapist is too busy

A physical therapist can appropriately terminate services when a patient is not making progress or refuses to participate in the plan of care. This scenario is critical because the effectiveness of physical therapy largely depends on the patient's active participation and adherence to the treatment protocol. When a patient fails to engage in their therapy, it becomes difficult for the therapist to achieve the desired outcomes, which can lead to stagnation in the rehabilitation process. In cases where a patient is non-compliant, the therapist must consider not only the therapeutic goals but also the need for collaboration between the therapist and the patient. If the patient is not participating as outlined in the plan of care, this raises concerns about the appropriateness and effectiveness of continued treatment. Consequently, when progress is not being made due to non-compliance or refusal to adhere to the therapeutic process, it is justified for the therapist to evaluate and potentially terminate services to allow the patient the opportunity to seek alternative solutions or more suitable interventions. Additionally, when patients have met their goals, it does not necessarily indicate the need for termination if there are further areas of improvement or additional goals to address. Likewise, a physical therapist's workload is not a valid reason for service termination; professional responsibilities require prioritization of patient care above personal convenience.

10. What may the PT section require if the licensee's physical or mental condition is questioned in a disciplinary proceeding?

- A. Immediate license revocation
- B. Submission to examinations by a healthcare practitioner**
- C. A public apology
- D. Compulsory training courses

The PT section may require submission to examinations by a healthcare practitioner in a disciplinary proceeding if the licensee's physical or mental condition is questioned. This is because the section wants to ensure the safety and well-being of the public and needs to assess the licensee's ability to practice safely. Immediate license revocation, a public apology, and compulsory training courses are all incorrect as they do not directly address the concern of the licensee's physical or mental condition. Revoking the license without proper assessment may be unfair to the licensee, a public apology does not ensure proper assessment, and compulsory training courses may not be relevant to the specific condition in question.
