Questions

SAMPLE

- 1. What does a solid yellow line alongside a broken yellow line mean?**
 - A. Passing is allowed on the side with the solid line.**
 - B. Passing is not allowed.**
 - C. Passing is allowed on the side with the broken line.**
 - D. Passing is allowed in both directions.**
- 2. What is shown in the image?**
 - A. Drive with caution.**
 - B. Share the road with oncoming traffic.**
 - C. Slippery when wet.**
 - D. Right lane ends.**
- 3. What does a sign with a picture of a person with a red diagonal line and the word "NO" indicate?**
 - A. No pedestrians allowed.**
 - B. No walking or jogging allowed.**
 - C. No crossing the road.**
 - D. No right turns allowed.**
- 4. What is shown in the image?**
 - A. Air show ahead.**
 - B. Airplane landing.**
 - C. Route to airport.**
 - D. Watch out for planes.**
- 5. What should you do if you are approaching a railway crossing with flashing lights and ringing bells?**
 - A. Stop at least 5 meters before the crossing.**
 - B. Slow down and proceed with caution.**
 - C. Speed up to clear the crossing quickly.**
 - D. Stop only if a train is visible.**

- 6. What is shown in the image?**
- A. Divided highway ahead.**
 - B. You are approaching a one-way street.**
 - C. Hidden intersection ahead.**
 - D. Pavement narrows.**
- 7. What is the minimum age requirement to apply for a G1 driver's license in Ontario?**
- A. 14 years old**
 - B. 16 years old**
 - C. 18 years old**
 - D. 21 years old**
- 8. What should you do if you approach an intersection with a yield sign and there is a pedestrian in the crosswalk?**
- A. Stop and wait for the pedestrian to cross completely.**
 - B. Slow down and proceed with caution, yielding to the pedestrian.**
 - C. Honk your horn to alert the pedestrian and proceed.**
 - D. Drive around the pedestrian and continue without stopping.**
- 9. What does a red circle with a diagonal slash across it indicate?**
- A. No entry or do not enter.**
 - B. No parking or stopping.**
 - C. No left turn allowed.**
 - D. No U-turn allowed.**
- 10. When can you legally pass another vehicle on the right side?**
- A. When the vehicle in front is signaling a left turn.**
 - B. When there is a paved shoulder on the right side of the road.**
 - C. When driving on a one-way street with multiple lanes.**
 - D. Passing on the right is never allowed.**

Answers

Explanations

SAMPLE

1. What does a solid yellow line alongside a broken yellow line mean?

- A. Passing is allowed on the side with the solid line.**
- B. Passing is not allowed.**
- C. Passing is allowed on the side with the broken line.**
- D. Passing is allowed in both directions.**

A solid yellow line alongside a broken yellow line means that passing is allowed on the side with the broken line, but not on the side with the solid line. This is because the solid line indicates a no passing zone, while the broken line indicates a passing zone. Therefore, option A is incorrect as passing is not allowed on the side with the solid line. Option D is incorrect because passing is only allowed on one side, not both directions. Option B is incorrect because passing is allowed on the side with the broken line.

2. What is shown in the image?

- A. Drive with caution.**
- B. Share the road with oncoming traffic.**
- C. Slippery when wet.**
- D. Right lane ends.**

3. What does a sign with a picture of a person with a red diagonal line and the word "NO" indicate?

- A. No pedestrians allowed.**
- B. No walking or jogging allowed.**
- C. No crossing the road.**
- D. No right turns allowed.**

The sign showing a person with a red diagonal line and the word "NO" indicates a prohibition concerning pedestrians. This specific sign is primarily interpreted as "No pedestrians allowed," meaning that individuals should not use that particular area for walking or crossing. The depiction of the person combined with the diagonal line serves as a clear visual cue that entry or crossing by pedestrians is restricted in that area. Understanding this helps in recognizing that such signs are placed for the safety of both pedestrians and drivers, particularly in zones where pedestrian activity could conflict with vehicle movement or where conditions are considered unsafe for foot traffic. Thus, interpreting this sign correctly is essential for following traffic regulations and ensuring the safety of all road users.

4. What is shown in the image?

- A. Air show ahead.**
- B. Airplane landing.**
- C. Route to airport.**
- D. Watch out for planes.**

5. What should you do if you are approaching a railway crossing with flashing lights and ringing bells?

A. Stop at least 5 meters before the crossing.

B. Slow down and proceed with caution.

C. Speed up to clear the crossing quickly.

D. Stop only if a train is visible.

Approaching a railway crossing with flashing lights and ringing bells indicates that there is a train approaching, and it is important to exercise caution. Therefore, option A is correct as it is important to stop at a safe distance of at least 5 meters before the crossing to allow the train to pass. Option B is incorrect as slowing down may not give enough time to stop before reaching the crossing. Option C is incorrect as it is dangerous to speed up and try to clear the crossing quickly. Option D is incorrect because even if a train is not visible, the lights and bells serve as a warning and stopping at the crossing is necessary.

6. What is shown in the image?

A. Divided highway ahead.

B. You are approaching a one-way street.

C. Hidden intersection ahead.

D. Pavement narrows.

7. What is the minimum age requirement to apply for a G1 driver's license in Ontario?

A. 14 years old

B. 16 years old

C. 18 years old

D. 21 years old

To obtain a G1 driver's license in Ontario, an individual must be at least 16 years old. Option A (14 years old) is incorrect as this is the minimum age requirement for a moped license. Option C (18 years old) and D (21 years old) are also incorrect as these are the minimum age requirements for obtaining a full G driver's license.

8. What should you do if you approach an intersection with a yield sign and there is a pedestrian in the crosswalk?

- A. Stop and wait for the pedestrian to cross completely.**
- B. Slow down and proceed with caution, yielding to the pedestrian.**
- C. Honk your horn to alert the pedestrian and proceed.**
- D. Drive around the pedestrian and continue without stopping.**

Approaching an intersection with a yield sign means that you do not have the right of way and must yield to any vehicles or pedestrians already in the intersection. Option A is the correct answer, as it follows the law of yielding to pedestrians in a crosswalk. Option B is incorrect because slowing down and still proceeding without stopping may not give the pedestrian enough time to cross safely. Option C is incorrect because honking may startle the pedestrian and could lead to a dangerous situation. Option D is incorrect and illegal because it does not give the pedestrian priority and puts them at risk. Therefore, option A is the safest and most responsible choice in this scenario.

9. What does a red circle with a diagonal slash across it indicate?

- A. No entry or do not enter.**
- B. No parking or stopping.**
- C. No left turn allowed.**
- D. No U-turn allowed.**

A red circle with a diagonal slash is typically used as a symbol for "prohibited" or "not allowed". A no entry or do not enter sign is typically used to indicate that a certain area is off limits and that entry is prohibited. The other options (B, C, and D) may also have a red circle with a diagonal slash, but they have different meanings. No parking or stopping means that you are not allowed to park or stop in a certain area. No left turn allowed means that making a left turn is prohibited and No U-turn allowed means that making a U-turn is not allowed on that particular road. In contrast, a red circle with a diagonal slash applied to a circle (like in this case) typically signifies a more general prohibition.

10. When can you legally pass another vehicle on the right side?

- A. When the vehicle in front is signaling a left turn.**
- B. When there is a paved shoulder on the right side of the road.**
- C. When driving on a one-way street with multiple lanes.**
- D. Passing on the right is never allowed.**

You can legally pass another vehicle on the right side when driving on a one-way street with multiple lanes. This is because it is typically allowed for a vehicle to pass on either side when there is more than one lane going in the same direction. Option A may seem like a possible answer, but it is actually incorrect because signaling a left turn does not necessarily guarantee that the vehicle will turn left, and it is not safe to assume. Option B is incorrect because it is not always legal to use the paved shoulder for passing, as it is meant for emergency use only. As for Option D, it is not a completely accurate statement, as there are certain situations where passing on the right may be allowed, such as on a highway with multiple lanes. However, it is generally not recommended to pass on the right, so Option C is the safest and most correct choice.
