Introduction

Preparing for a certification exam can feel overwhelming, but with the right tools, it becomes an opportunity to build confidence, sharpen your skills, and move one step closer to your goals. At Examzify, we believe that effective exam preparation isn't just about memorization, it's about understanding the material, identifying knowledge gaps, and building the test-taking strategies that lead to success.

This guide was designed to help you do exactly that.

Whether you're preparing for a licensing exam, professional certification, or entry-level qualification, this book offers structured practice to reinforce key concepts. You'll find a wide range of multiple-choice questions, each followed by clear explanations to help you understand not just the right answer, but why it's correct.

The content in this guide is based on real-world exam objectives and aligned with the types of questions and topics commonly found on official tests. It's ideal for learners who want to:

- Practice answering questions under realistic conditions,
- Improve accuracy and speed,
- Review explanations to strengthen weak areas, and
- Approach the exam with greater confidence.

We recommend using this book not as a stand-alone study tool, but alongside other resources like flashcards, textbooks, or hands-on training. For best results, we recommend working through each question, reflecting on the explanation provided, and revisiting the topics that challenge you most.

Remember: successful test preparation isn't about getting every question right the first time, it's about learning from your mistakes and improving over time. Stay focused, trust the process, and know that every page you turn brings you closer to success.

Let's begin.

How to Use This Guide

This guide is designed to help you study more effectively and approach your exam with confidence. Whether you're reviewing for the first time or doing a final refresh, here's how to get the most out of your Examzify study guide:

1. Start with a Diagnostic Review

Skim through the questions to get a sense of what you know and what you need to focus on. Your goal is to identify knowledge gaps early.

2. Study in Short, Focused Sessions

Break your study time into manageable blocks (e.g. 30 – 45 minutes). Review a handful of questions, reflect on the explanations.

3. Learn from the Explanations

After answering a question, always read the explanation, even if you got it right. It reinforces key points, corrects misunderstandings, and teaches subtle distinctions between similar answers.

4. Track Your Progress

Use bookmarks or notes (if reading digitally) to mark difficult questions. Revisit these regularly and track improvements over time.

5. Simulate the Real Exam

Once you're comfortable, try taking a full set of questions without pausing. Set a timer and simulate test-day conditions to build confidence and time management skills.

6. Repeat and Review

Don't just study once, repetition builds retention. Re-attempt questions after a few days and revisit explanations to reinforce learning. Pair this guide with other Examzify tools like flashcards, and digital practice tests to strengthen your preparation across formats.

There's no single right way to study, but consistent, thoughtful effort always wins. Use this guide flexibly, adapt the tips above to fit your pace and learning style. You've got this!

Questions

SAMPLE

- 1. Which code would require all but emergency traffic to be held?**
 - A. Signal 60
 - B. Signal 100
 - C. 10-90
 - D. Priority 1
- 2. Which of the following codes signifies a request for backup?**
 - A. Code 99
 - B. 10-12
 - C. 11-15
 - D. 10-54
- 3. What is the police code for a missing person?**
 - A. 524
 - B. 790
 - C. 601
 - D. 992
- 4. Which code should officers use to describe a scene that has been assessed or reached?**
 - A. 10-23
 - B. 10-11
 - C. 10-15
 - D. 10-13
- 5. What indicates that a situation has been resolved or stabilized in police codes?**
 - A. Code 4
 - B. Signal 11
 - C. Code 3
 - D. Code 5

- 6. What does 'Code 4' signal to officers in the field?**
- A. All Units Respond
 - B. Under Control
 - C. Out of Service
 - D. Proceed with Caution
- 7. What does the code "10-93" represent?**
- A. In Route
 - B. Removed from Game
 - C. Officer In Distress Extreme Emergency Only
 - D. Person Deceased
- 8. What type of information is commonly recorded under the police code 10-43?**
- A. Suspicious activity
 - B. Information
 - C. Homicide
 - D. Traffic violation
- 9. What does Signal 11 indicate in police codes?**
- A. Running Radar
 - B. Vehicle Theft
 - C. Traffic Accident
 - D. Suspicious Activity
- 10. What is the meaning of police code 998?**
- A. Officer involved shooting
 - B. Domestic disturbance
 - C. Wanted or stolen indicated
 - D. Traffic accident

Explanations

SAMPLE

1. Which code would require all but emergency traffic to be held?

- A. Signal 60
- B. Signal 100**
- C. 10-90
- D. Priority 1

The code that requires all but emergency traffic to be held is Signal 100. This code is typically used during critical incidents, such as a major emergency response or a serious incident where the information flow needs to be controlled to avoid congestion on communication channels. By holding non-emergency traffic, responders can ensure that vital communications related to the incident can be made without interference, allowing for a more efficient and effective emergency response. The other options, while they may pertain to different scenarios or types of incidents, do not convey the specific directive to hold all non-emergency communications. For instance, Signal 60 often pertains to a specific type of emergency or operational directive, while the 10-90 code and Priority 1 may represent different levels of urgency or types of calls, but none explicitly require the cessation of non-emergency traffic like Signal 100 does.

2. Which of the following codes signifies a request for backup?

- A. Code 99
- B. 10-12**
- C. 11-15
- D. 10-54

The code that signifies a request for backup is 10-12. This code is part of the ten-codes used by law enforcement and emergency services to provide clear and concise communication over radio systems. When an officer calls for 10-12, they are indicating that they need assistance and are requesting other units to respond to their location to provide additional support. Understanding the context of this code is critical for effective emergency response. Officers frequently find themselves in situations where additional manpower is necessary, whether for safety reasons or to handle a particularly complex incident. Using standardized codes like 10-12 helps ensure that every officer in the field knows exactly what is happening without having to use lengthy explanations. Other codes listed serve different purposes. For instance, Code 99 typically refers to an officer needing immediate help due to an emergency situation, while 11-15 and 10-54 may refer to specific incidents or statuses that do not pertain to requesting backup. Familiarity with these codes is essential for smooth communication in high-pressure situations.

3. What is the police code for a missing person?

- A. 524
- B. 790
- C. 601**
- D. 992

The police code for a missing person is indeed 601. This code is commonly used in law enforcement to quickly and effectively communicate the situation without unnecessary detail over the radio or the dispatch system. The use of standardized codes, like 601 for a missing person, enables officers to respond appropriately and allocate resources efficiently when they need to locate an individual who may be in danger or has disappeared under suspicious circumstances. The context of using specific codes like this is critical in emergency response settings, where time is of the essence, and clarity is key. The other codes listed serve different purposes and are tailored to other situations that law enforcement officers might encounter, but 601 specifically pertains to missing persons, highlighting the importance of swift action in those scenarios.

4. Which code should officers use to describe a scene that has been assessed or reached?

A. 10-23

B. 10-11

C. 10-15

D. 10-13

The code used to describe a scene that has been assessed or reached is indeed 10-23. This code signifies that an officer has arrived at a particular location and has assessed the situation at hand. It is essential for maintaining clear communication among officers, as it communicates to dispatch and other officers that the situation is under observation and that the officer is actively engaged with the scene. The other codes have different meanings: 10-11 typically refers to a traffic stop, 10-15 indicates the arrest of a person, and 10-13 is used for requesting weather conditions. Each of these has a specific context and purpose within police communication, emphasizing the importance of using the correct code to convey precise information regarding an officer's status and the situation they are responding to.

5. What indicates that a situation has been resolved or stabilized in police codes?

A. Code 4

B. Signal 11

C. Code 3

D. Code 5

The indication that a situation has been resolved or stabilized in police codes is represented by "Code 4." This code is universally understood among law enforcement and emergency responders to mean that the situation is clear, and no further assistance is needed at that point. Essentially, it conveys to all units that they can discontinue their current response effort regarding the incident, reflecting a state of resolution or stabilization in the environment where the code is communicated. Other codes, like "Signal 11," typically do not convey an end or stabilization of a situation. "Code 3" refers to the use of lights and sirens for urgent responses, indicating that officers are responding to a situation that requires immediate attention. "Code 5" usually designates a stakeout, where units are expected to remain in a specific position for surveillance rather than indicating resolution. Each code has its specific context and usage, making "Code 4" the appropriate choice for signaling that a situation has been resolved.

6. What does 'Code 4' signal to officers in the field?

A. All Units Respond

B. Under Control

C. Out of Service

D. Proceed with Caution

'Code 4' signals to officers in the field that a situation is "Under Control." This indicates that the current incident or situation has been stabilized and does not require additional units or urgent assistance. It's a way for officers to communicate clearly and efficiently that they are managing a scenario and that the need for heightened response or backup has diminished. Understanding this code is essential for maintaining effective communication among law enforcement personnel during incidents, ensuring that resources are allocated properly based on the current status of a scene. When officers inform dispatch or other units that a scenario is "Under Control," it allows for a more organized response and the reallocation of resources where they may be more urgently needed.

7. What does the code "10-93" represent?

- A. In Route
- B. Removed from Game**
- C. Officer In Distress Extreme Emergency Only
- D. Person Deceased

The code "10-93" is commonly recognized within law enforcement as representing "Officer In Distress Extreme Emergency Only." This code is critical for ensuring that officers in a dire situation can signal that they require immediate assistance. When this code is used, it alerts other officers that the situation is urgent and that they need to respond quickly to provide support. Understanding the significance of this code highlights the importance of communication in emergency response scenarios. It serves as a lifeline for officers who may find themselves in life-threatening situations, ensuring they get the help they need as quickly as possible. While other codes exist for various scenarios, "10-93" specifically conveys a dire emergency involving an officer, illustrating the unique challenges they face in the line of duty.

8. What type of information is commonly recorded under the police code 10-43?

- A. Suspicious activity
- B. Information**
- C. Homicide
- D. Traffic violation

The police code 10-43 is specifically used to communicate the need to report information. This code indicates that officers are expected to relay or gather information that may be relevant to law enforcement activities. It serves as a prompt for officers to share important data, tips, or insights that could assist in ongoing investigations or enhance situational awareness. In contrast, while suspicious activity, homicide, and traffic violations are pertinent law enforcement matters, they do not accurately reflect the specific nature of what 10-43 encompasses. Suspicious activity might be reported through different codes or channels, while homicide and traffic violations are categorized under separate, more specific codes that deal with those incidents directly. Thus, recording information under the 10-43 code ensures that officers can efficiently communicate critical updates or intelligence that might not fall under other specific categories.

9. What does Signal 11 indicate in police codes?

- A. Running Radar**
- B. Vehicle Theft
- C. Traffic Accident
- D. Suspicious Activity

Signal 11 refers specifically to "Running Radar." This code is used by law enforcement to indicate that an officer is actively using radar equipment to monitor vehicle speeds. Understanding this police code is crucial for officers in the field, as it helps communicate their current activity to other units and dispatch centers. It allows for situational awareness among officers, enabling them to coordinate and respond to traffic violations effectively. In contrast, the other options represent different scenarios that police officers may encounter. Vehicle theft, traffic accidents, and suspicious activity are important situations that require attention, but they are communicated through different codes. Each code serves a specific purpose and helps streamline communication within the law enforcement community.

10. What is the meaning of police code 998?

- A. Officer involved shooting
- B. Domestic disturbance
- C. Wanted or stolen indicated
- D. Traffic accident

The police code 998 specifically refers to an officer-involved shooting. This code is used by law enforcement to communicate about critical and potentially dangerous incidents where a police officer has discharged their firearm, particularly at another individual. Utilizing a code like 998 helps ensure that officers can quickly and efficiently notify dispatch and request the necessary backup and medical assistance, while also keeping communications clear and concise in high-stress situations. In contrast, the other options represent different types of incidents that do not directly pertain to an officer's use of force involving a shooting. A domestic disturbance pertains to disputes within households, a wanted or stolen indicated code relates to issues involving stolen property or suspects who are wanted, and a traffic accident denotes incidents on the road involving vehicles. Each of these has its own distinct codes and response protocols, which differ significantly from those used for an officer-involved shooting.
